

DISPOSAL AND WEIGHT ALLOWANCE POLICY

1. Disposal Allowances

Each rental package includes a defined disposal allowance as outlined in the selected package, estimate, or invoice at the time of booking. Disposal allowances are provided as part of the overall service price.

2. Included Weight

Included disposal weight represents the maximum amount of material covered by the package price. Disposal allowances are based on service limits and operational averages, not individual landfill charges.

3. Excess Weight and Overage Charges

Loads exceeding the included disposal weight are subject to additional tonnage charges at the published overage rate. Overage charges are calculated based on the measured disposal weight associated with the service provided.

4. Disposal Pricing Structure

RO RO Rentals offers flat-rate service packages that include disposal up to the stated weight allowance. Disposal charges are not reconciled against individual landfill invoices and are not adjusted based on landfill minimums or rate fluctuations.

5. Additional Dumps

Dumps beyond those included in the rental package are billed separately at the applicable rate. Each additional dump includes disposal subject to the same weight allowance and overage terms unless otherwise stated in writing.

6. Customer Responsibility

Customers are responsible for all disposal-related charges incurred during the rental period, including excess weight charges and additional dump fees resulting from material volume, density, or usage beyond the package limits.

7. Policy Acknowledgment

Booking a rental, authorizing disposal services, or continuing use of a dumpster constitutes acknowledgment and acceptance of this Disposal & Weight Allowance Policy.
